

Global Visibility Toggles Tab

One of the major focuses in OTR deals with track organization. This is quite possibly the most painful part of handling large sessions with hundreds to thousands of track counts in other DAWs. But OTR solves this in a way no other DAW can. That's not just hyperbole. It really does. As you will see, any of the tab bar menus that contain the words "visibility toggles" in the tab name indicate the buttons will handle track organization. The buttons toggle on and off large groups of tracks based on the parent track type. For example, "Categories" will toggle on and off all of the VI-C tracks and their children.

- **OTR Info Track** - the very first track in the template
- **Video Track**
- **Stems** - the full stem section
- **Rendered Stems** - only the rendered stems, not the output tracks in the stems folder
- **Imported Tracks**
- **Live Tracking**
- **FX**
- **VCAs**
- **Categories No Tracks** - this only toggles off the parent VI-C tracks
- **Categories** - this toggles off all VI-C tracks and all of the children
- **VI Tracks Only** - if the track starts with "VI" it will be toggled off
- **Hidden Info** - Bet you didn't know OTR has hidden tracks. You won't see these usually... at least not intentionally.... If you want to see them or turn them off, toggle them on and off here.
- **Show All**
- **Hide All**

VI-C Visibility Toggles Tab

This tab will toggle the visibility of each VI-C and its respective children tracks. Take note that regardless of the visibility state of each of the VI-C's children tracks before they are toggled out of view, this will not toggle back on VI-MIDI or the VI-OUTS group of tracks. Those can be toggled on and off elsewhere. This was a design choice to make sure views are as efficient as possible.

- **Strings**
- **Solo Strings**
- **Brass**
- **Solo Brass**
- **Winds**
- **Solo Winds**
- **Ethnic Winds**
- **Percussion**
- **World Percussion**
- **Plucked**
- **Choir**
- **Drum Kit**
- **Bass**
- **Guitars**
- **Esoteric**
- **Synth**
- **Rhythmic & Hits**
- **Piano & Keys**
- **Misc**
- **SFX**
- **Vocals**
- **Background Vocals**
- **All**
- **All No Tracks** - this one will not show children tracks at all
