## TrackPack Installation Information for Orchestral Template For Reaper

### **Thank you for your purchase!**

If you purchased a special OTR bundle that included TrackPacks, these will be pre-installed with your OTR installation. If you purchased a TrackPack separately from a bundled OTR package, please read on in order to install the TrackPacks.

The TrackPacks that you have purchased will be delivered in a zip file. Once the file is unzipped, just move the purchased TrackPack into the Orchestral Template For Reaper//TrackTemplates/OTR TrackPacks folder.

If for some reason you wanted to create your own directory, or manage the TrackPack folders in a different way, feel free to go at it. As long as you remain in the TrackTemplates folder, you can place the TrackPack wherever you would like. The default destination would normally be located within the “OTR TrackPacks” master folder.

Once installed, the TrackPacks should now be available within the **right-click->insert track from template->OTR TrackPacks** menu within OTR. Just navigate to the folder you placed the TrackPack within.
